Introduction

The best work chair for every workspace
For many people, their chair is their workspace. That is where employees spend most of their working hours. It is essential for employees to feel comfortable in their workspace and that this environment is ergonomically, functionally, environmentally friendly, economically and aesthetically structured. A good workspace increases productivity and reduces absenteeism.

A work chair is a chair tailored to the profession and the workspace. This differs per position and per company. Personal preferences of course also play a role. Work chairs come in various types and materials.

Stool

Stools are very handy on the work floor. For both hard and soft floors. A stool can be put on wheels or gliding knobs. You can quickly and easily move around with a stool on wheels. And if you want a stool to stay in the same place, opt for a stool with gliding knobs. The seat height is adjustable so that anyone can sit comfortably.

 - Lumbar support adjustable in depth

Saddle stool

Do you stand while working and do you often suffer from neck or back pain? Then the Saddle stool is the solution! The Saddle stool has an ergonomic seat with an adjustable seat angle to make you sit in a natural position. This position relieves pressure on your back and neck and ensures a proper and correct posture, which can prevent problems in the back, hips or knees. The Saddle stool can be used anywhere and is also available with a narrower seat. Perfect for women or people with a smaller posture.

1272

Standing stool

It's all about variety. Whoever stays in the same position for a long time, needs support because standing for long periods of time is a heavy strain on the body. The standing stool provides support for a wide range of standing activities. It is the right support for relieving pressure on your legs and back. With a large handle on the back of the chair to make it easy to move.

Work chair

Work chairs come in different shapes and sizes. It is especially important for those working to sit comfortably when on the job. The most essential things to focus on when determining the right chair in the right workspace are seat height, duration of use and the material. Comfort plays a role as well. You have to be able to sit and stand up easily and be able to change positions. And the chair has to be easily adjustable to each person

** Measured with load following European Norm (60kg).

Warranty
conditions

1. The warranty has a maximum duration of 5 years starting on the day of delivery, based on daily use of the chairs of 8 hours a day. If the chair is used more frequently, the warranty term will be reduced proportionately. The original invoice is required as proof of purchase.
2. The warranty does not cover normal wear and tear of wheels, upholstery and gas lift.
3. Please contact your dealer regarding all warranty claims.
